WHAT IS DEMENTIA CARE AWARE?

Dementia Care Aware provides free online training for primary care teams to conduct a 5-10 minute cognitive health assessment (CHA) and access additional resources for evaluation and care planning. Providers can bill Medi-Cal using code 1494F for patients 65 and older. The program includes free CE/CME credits and offers guidance on next steps in dementia care.

WHY IS SCREENING FOR COGNITIVE HEALTH IMPORTANT?

- Dementia will soon affect 1 in 5 older Californians.
- Dementia impacts ones ability to self-manage day-to-day activities and medications.
- Detecting dementia early allows for timely brain health planning, which can slow progression.
